<b>CLASS/CLASSES INVOLVED</b>	:	<b>CLASS 10</b>
<b>NAMES OF PARTICIPANTS</b>	:	<b>ALL STUDENTS OF CLASS 10.</b>

**A BRIEF REPORT.**

“Education is not the filling of a pail but the lighting of a lamp.” This sums up the whole essence of what our years at school do for us. In keeping with this, our school took students of class X to visit the prestigious Armed Forces Medical College, to actually see and experience in practical, all that we learn about at school.

The trips were for all sections of the 10<sup>th</sup> grade, and different sections were taken to AFMC from the 16<sup>th</sup> to the 18<sup>th</sup> of July. We were taken on a tour of their Anatomy Museum first. AFMC has a vast assortment of specimens of the human body, including a comprehensive collection of bones, fetuses and organs. Seeing them truly made our lessons come alive! The valuable inputs that the AFMC officers gave us were both helpful and interesting. After this, we were taught about some life-saving techniques, including basic life support, CPR, and advanced cardiac life support. We were even allowed to try chest compressions on the dummies and mannequins the AFMC staff had provided. We also visited their war museum, with its many pictures and artifacts. Later on, after some snacks, we were shown a short presentation on what life is like at the college. Finally, after expressing our gratitude to all the doctors and professors, we took our leave.

Truly, this has been such an enriching experience! It has brought Science out of our textbooks, making it simpler, and more interesting to visualize and understand. I’m extremely grateful to our Headmaster, and all of our teachers, for making this possible for us.
