A BRIEF REPORT.

The IRO organized by LEGO AND TECHTRONICS , INDIA was held on 5th OF AUGUST, at the Maharashtra Academy of Engineering, Alandi in which three teams from our school took part entering in the Junior High category whose scenario was called 'Robot Columbus'.

After working with the design, construction and programming of the robots for almost a month, the four teams left for the trial round on the 4TH of August, 2013.

The main event the next day consisted of two rounds where the team's robots had to navigate certain obstacles on the game field, collect useful resources and return to the base position placing each cylinder in the corresponding color basket the maximum points that could be earned was 230 points.

On the morning of the competition the all participants were served breakfast. Following this they were given two and a half hour to assemble their robots. This culminated in the first round which proved to be rather thrilling.

This was followed by a break where all participants were served lunch .After this we were given another hour to make some changes to the robots which was followed by the second round. After this, the best score of the two attempts was considered and accordingly rankings were given.

It turned to be a very challenging and closely contested competition

Our team comprising of Nikhil John, Dhruv Bose and Sarransh were declared the 1st Runner Up team and they have qualified for the NATIONAL FINALS, which is to be held in Delhi on the 14th of Sept, 2013.

ALL THE VERY BEST BOYS!!!!!!
